

Dear Sirs, Please consider this comment regarding the NAB's petition 04-160.  
As a subscriber to satellite radio I value the benenfit of access to the weather and traffic information. When traveling by car it has been of frequent benefit in planning my approach to a city , giving me trafficn information in a timely manner that I would not have been able to access from local stations until I was already in the locality and committed to an approach that was the wrong one. I pay for the value that this radio provides and resist the efforts of a trade group to limit my access to this valuable service  
Thank you

Respectfully,  
Michael Werdmann
